

Huemer is a young, dynamic, ambitious company from the beautiful Salzkammergut in Upper Austria. Our philosophy lies in the development and production of mechanical fruit collection machinery. The „Obstler“ was developed for the time-saving harvesting of pressing fruit. The machine's robust nature has been demonstrated when purchased by cooperatives.

## SPECIAL FEATURES

### 1. PIN TUMBLER:

Because of the wire pins, the fruit is pierced and stripped in the respective containers.

Barrel, pins and Reject-grid are made of food safe stainless steel and guarantee a long life. The barrel drive takes place automatically on the ground and thus ensures optimal rotation.

Furthermore, a special protective grille protects against injuries.

### 2. HEIGHT ADJUSTMENT:

Because the fruit size and the terrain requires different working heights, the collector is equipped with a height adjustment. Type: 800, 1100, 1500 & 1100E

### 3. SINGLE SUSPENSION OF WORK DRUMS:

The pen barrels are individually suspended and adapt in this way the respective soil. Type: 1100, 1500 & 1100E

### 4. PARKING BRAKE:

The brake lever can be hooked into the catch hook, and thus there is a wheel braking (for all types available).
